

CONNECTING MANUFACTURING & ENGINEERING TO LEARNING THROUGH STEM

Presents

RANCH ROBOTICS SUMMER CAMP

Overview

This camp is open to Weston Ranch students entering grade 7-9. Students will work in small teams, using the VEX Robotics Design System to build a frame and base, drivetrains, geared armature, engineer wiring and write code in ROBOTC to control their robot. Students will learn to adapt the design and coding of their robot to compete in various challenges.
